IRISa ID

iCAM Cradle
Quick Start Guide

Short Hand Screw (2 EA)

Cradle Top (1 EA)
for iCAM4100 only

Cradle Base (1 EA)
for both iCAM4000 and iCAM4100

Long Hand Screw (2 EA)

Cradle Foot (2 EA)

Installation for iCAM4000

1 Before assembling cradle, connect all iCAM wiring (see iCAM Hardware Manual).

2 Make sure wires are passed through the back of the cradle base.

3 Place iCAM into cradle, and secure in place with two <u>short</u> hand screws from the back side, making sure to position so that cradle depresses tamper switch.

**4** Affix feet to cradle aligning from bottom, thensliding up into place.
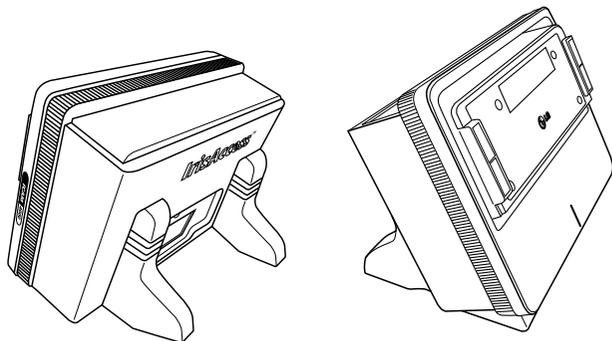

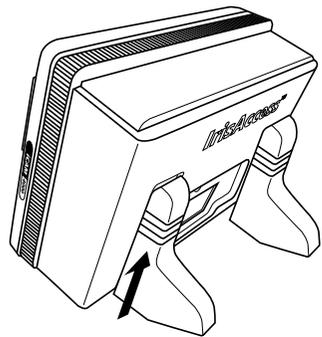

Installation for iCAM4100

1 Before assembling cradle, connect all iCAM wiring (see iCAM Hardware Manual).

2 Use two <u>short</u> hand screws to secure cradle top to cradle base (from inside front to back).

3 Make sure wires are passed through the back of the cradle base.

4 Place iCAM into cradle, and secure in place with two <u>long</u> hand screws from the back side, making sure to position so that cradle depresses tamper switch.

5 Affix feet to cradle aligning from bottom, then sliding up into place.
