

# IrisTime™ iTMS Cloud

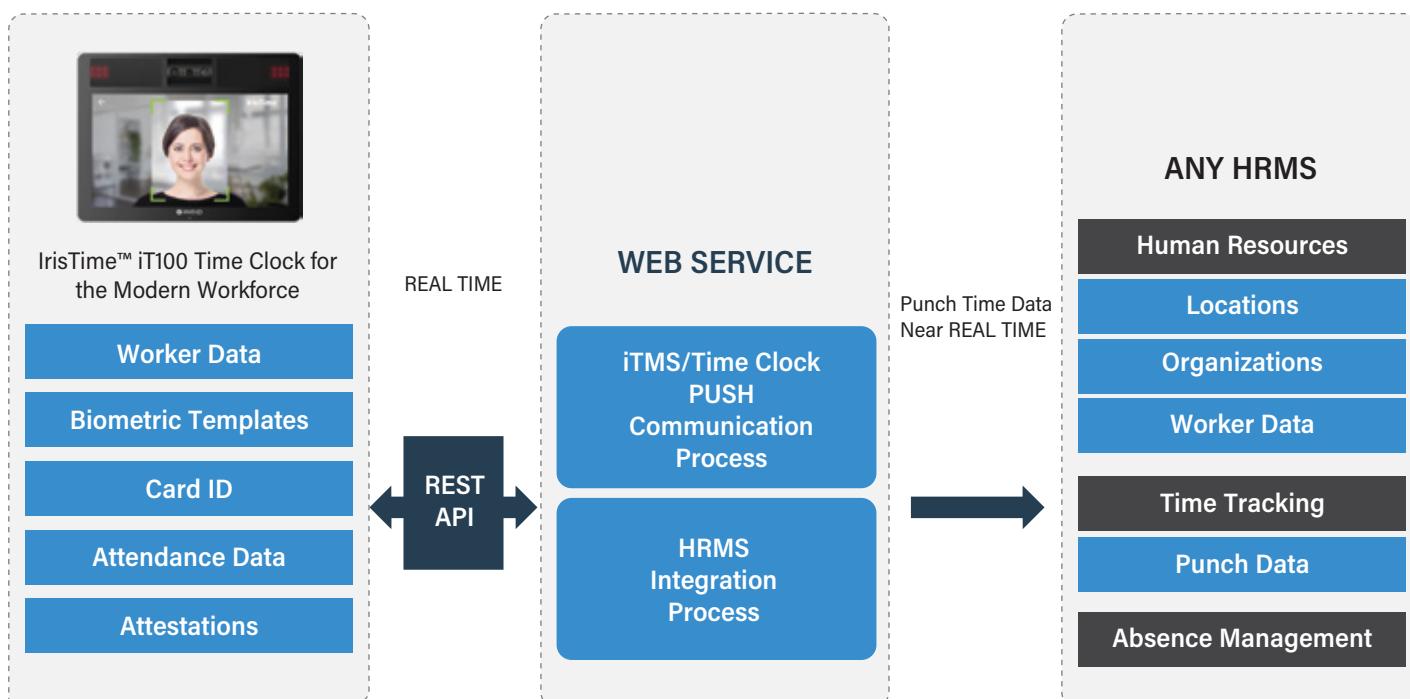

Thoughtful Cloud Solution for HRMS

The Iris ID IrisTime™ iTMS Cloud offers real-time data collection between time clocks and your HRMS. It is a thoughtful solution that fits many complex workforce management scenarios.

The iTMS Cloud provides accuracy, flexibility and transparency for HR managers and allows them direct visibility into punch information, job transfers, and more. iTMS Cloud can also connect multiple employees and locations for different assignments.

iTMS Cloud solution provides a simple connection between any HRMS data entry and data processing systems to reduce costs and eliminate human errors by automating the collection of punch data and securely delivering the data to a selected HRMS in near real time.

## Fast Time to Market

iTMS Cloud based management system enables Iris ID resellers and customers to manage devices and user information securely in a central location. iTMS Cloud provides a simple and secure solution to reduce critical time to market delivery of data collection. Additionally, IrisTime REST API interface allows our solution providers to customize the service as per their clients' needs.

## Accuracy and Security

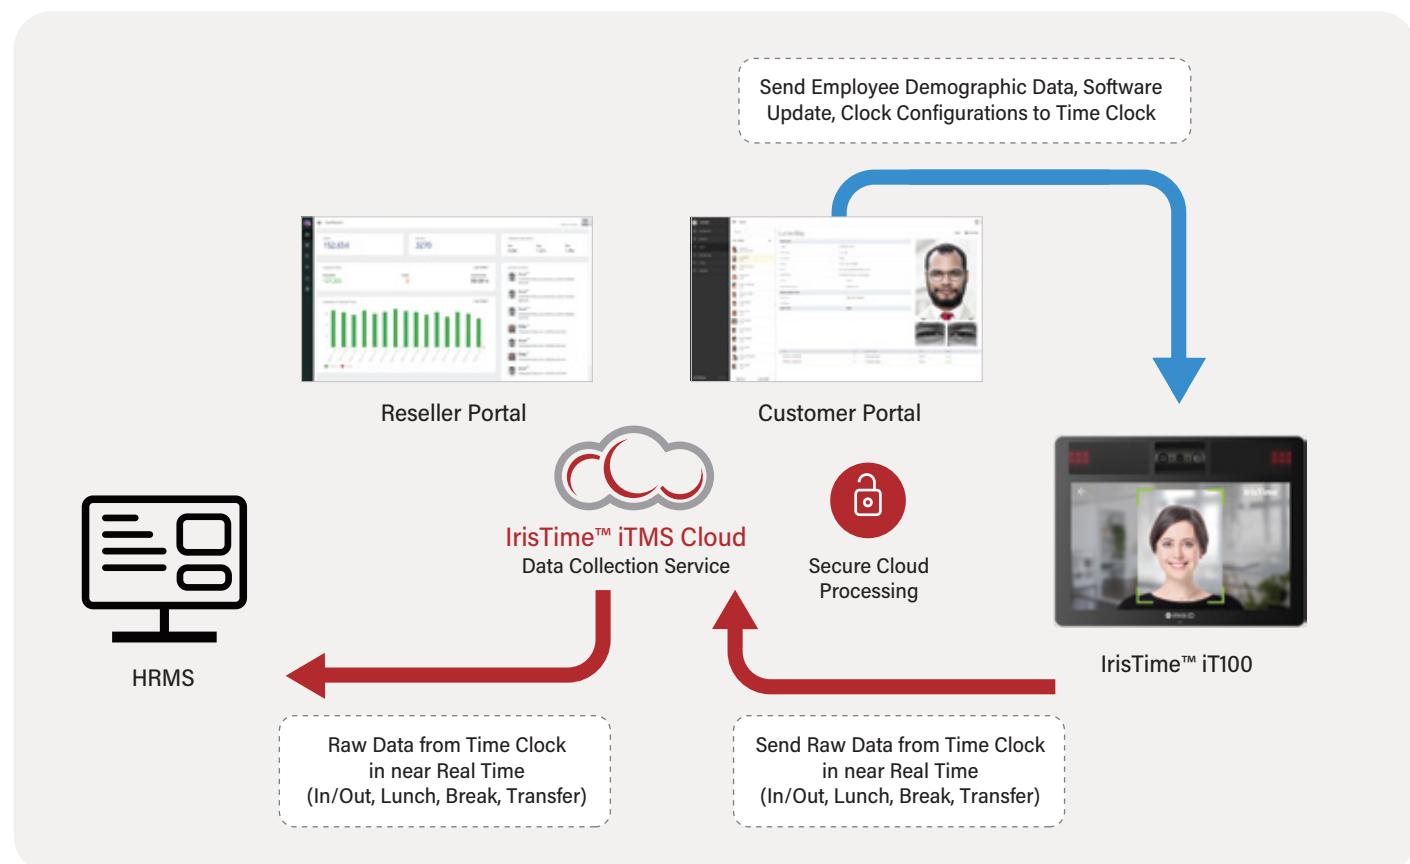

iTMS Cloud based management system enables Iris ID resellers and customers to manage devices and user information securely in a central location. iTMS Cloud provides a simple and secure solution to reduce critical time to market delivery of data collection. Additionally, IrisTime REST API interface allows our solution providers to customize the service as per their clients' needs.

## Time Clock Management

The IrisTime iTMS Cloud solution allows management of connected clocks and employee information through a reseller or client web portal. The portal allows the reseller or client to check the health of each device, review punch data and employee information, including management of transactions to HRMS. The iTMS Cloud REST API interface allows our resellers to automate the configuration process to bring efficiency in the process.

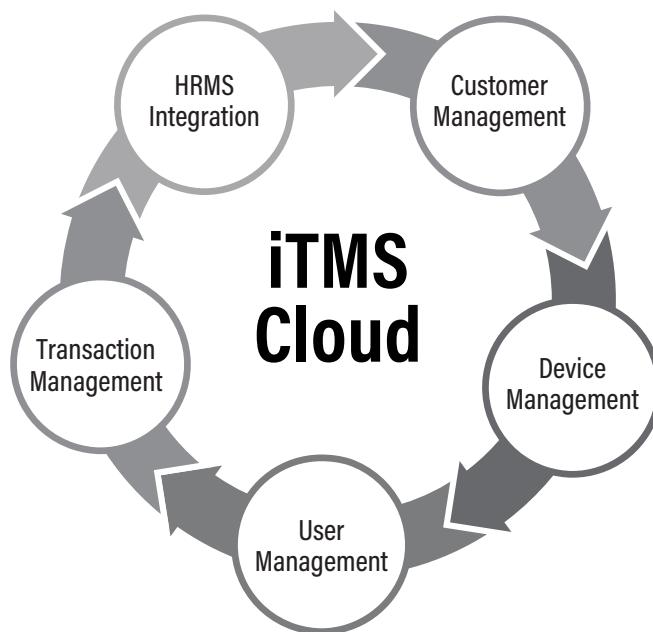

## Scalability

The iTMS Cloud solutions is designed to provide our reseller and clients with the scalability and flexibility their business requires and is configured to handle large volumes of punch data and devices on the network through the web portal. iTMS Cloud can manage hundreds of thousands of devices in real time.

## iTMS Cloud Functionality

- Reseller onboarding
- Customer Management
- Device Management
- User Management
- Transaction Management
- HRMS Integration
- Audit Trails

## Benefits of iTMS Cloud

IrisTime™ iTMS Cloud
